

CARLOS FERNANDO JACOB VÁSQUEZ RODRIGUEZ

Fullstack Developer | DevOps & Artificial Intelligence • C#/.NET • React/Next.js

Lima, Peru | +51 953 720 994 | carlouvasquez134@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL PROFILE

Fullstack Developer with 2+ years of experience in **C#/.NET**, **React/Next.js**, and **Kotlin**, specialized in **DevOps** (Docker, CI/CD, AWS/Azure) and applied **Artificial Intelligence** (OpenAI, Machine Learning). I design and deliver scalable enterprise solutions with measurable impacts of up to **40%** in operational efficiency, applying Clean Architecture, SOLID, and role-based access control. Systems Engineering degree candidate (UPC, Top Fifth), English B2.

PROFESSIONAL EXPERIENCE

Zoluxiones Latam

Pre-Professional Development Intern | Apr 2026 – Present

- Built fullstack modules with **React 19** (shadcn/UI, Zustand, TanStack Query) on the frontend and **C# with .NET**, Clean Architecture, and SOLID on the backend, integrating SQL Server via native ADO.NET and Stored Procedures to ensure traceability and data access control.
- Implemented REST endpoints for backend architectures and APIs using **C#** and **Java** (Spring Boot) with Swagger, JSON/XML, and role-based access control on SP tables; included an email delivery service and integrated the **OpenAI API** to power AI-driven features.
- Optimized file retrieval from **AWS**, eliminating critical loading bottlenecks; automated IIS deployments and containerized PostgreSQL in **Docker** for reproducible, scalable environments.
- Strengthened legacy systems in **C#** and Visual Basic through migration feasibility analysis and evolutionary maintenance, reducing technical debt in critical business modules.
- Architected the Next.js/Node.js frontend with Redis caching, improving system efficiency by **15%**.
- Designed an internal task management tool (Jira-style) alongside the team, reducing coordination meetings by **40%** and streamlining work assignment under Scrum.
- Modernized a legacy microservice to **Kotlin**, strengthening its security; implemented CI/CD pipelines with Docker and GitLab; audited Django microservices to ensure system integrity.
- Designed and implemented an Android app with WebSockets and a Kotlin API with a visual interface for real-time robot control, presenting the MVP to management and clients.

Mediterranean Shipping Company del Perú SAC

Pre-Professional IT Intern (Development) | Dec 2023 – Feb 2026

- Built **10+ enterprise modules** under Clean Architecture, SOLID, and CQRS, impacting critical internal business processes.
- Led the migration from **jQuery** to **Angular**, achieving a **20% improvement** in response speed and maintainability; managed the lifecycle in Azure DevOps under Scrum and executed unit tests with xUnit.
- Managed IIS deployments and SQL Server (Stored Procedures, Jobs) with Azure Blob Storage integration to centralize document management.
- Mastered Visual Basic to strengthen support for critical legacy systems, ensuring uninterrupted operational continuity.
- Automated bulk data processing with **Python/Pandas** and optimized operational workflows with **Power Automate**, eliminating manual workload in repetitive processes.

EDUCATION

Universidad Peruana de Ciencias Aplicadas (UPC)

Information Systems Engineering — Top Fifth (Quinto Superior) | 2020 – 2026

- Currently in 10th and final cycle.
- Thesis (completed): Designed and implemented a web-based system for SOC alert optimization based on the NIST framework and Machine Learning (Random Forest), featuring classification, prioritization, and model explainability via SHAP.

TECHNICAL SKILLS & LANGUAGES

Backend: C#, .NET (Framework/Core/5+), ASP.NET MVC, ADO.NET, Java SE/EE, Spring Boot, Spring MVC, Visual Basic, Node.js, Python (Django), Kotlin, REST Web APIs, JSON, XML, Swagger, Clean Architecture, SOLID, CQRS, Entity Framework.

Frontend: JavaScript, jQuery, HTML5, CSS3, React.js (Next.js), Angular, TypeScript, shadcn/UI, Tailwind CSS, Zustand, TanStack Query.

Artificial Intelligence & Data: Machine Learning (Random Forest, scikit-learn), SHAP, OpenAI API integration, Python (Pandas).

Databases, Cloud & DevOps: SQL Server (Stored Procedures, table-level roles), PostgreSQL, Azure (DevOps, Blob Storage), AWS, Docker, Git, GitLab CI/CD, IIS, Power Automate, Scrum, Excel (Advanced).

Languages: English B2 – Upper Intermediate (We Talk, UPC); Japanese, Basic.
